

MAURICE JOHNSON

Current Title: Senior Software Engineer (Platform & API)

Phone: 904.477.2268

Email: mauricejohnson3@protonmail.com

Location: Florida, United States

Work Authorization: US Citizen

Website: <https://www.linkedin.com/in/maurice-johnson-80085/>

Personal Website: <https://trippintheurl.com>

Summary

Highly accomplished Senior Software Engineer with over two decades of experience specializing in scalable backend architecture, API design, and Cloud-native ecosystems. Proven expert in engineering robust RESTful Microservices and CI/CD pipelines that drive enterprise efficiency through automation and reusability. Python Certified (PCEP) with a strategic focus on integrating Artificial Intelligence, LLMs, and Machine Learning into the SDLC to accelerate development velocity. Recognized for excellence in Technical Documentation (Confluence/Jira), cross-functional mentorship, and establishing "Golden Path" engineering standards for global organizations.

Technical Skills

Programming and Scripting: Java, Python, SQL, Bash, PowerShell, Groovy (Jenkins DSL), cURL.

Frameworks and Libraries: Spring Boot, Spring Framework, Spring Cloud, Spring Security, Spring Web, JPA, Hibernate, JUnit, Mockito, PowerMockito, Selenium.

Cloud Platforms: AWS, EKS, ECS, EC2, S3, ELB, VPC, SSM, CodeBuild, CodeDeploy, CodePipeline, IAM (Roles/Policies), Secrets Manager, Parameter Store, MSK, Glue, RDS, DynamoDB, Redshift, Cognito, **Azure**, Microsoft Entra ID (SSO), ForgeRock integration.

DevOps and Infrastructure: Docker, Podman, Kubernetes, Helm, Terraform, Terraform Cloud, Spacelift, CloudFormation, Istio Service Mesh, Sidecar patterns.

CI/CD and Build Tools: Jenkins, GitHub Actions, Maven, Gradle, JFrog Artifactory, JFrog X-Ray, SonarQube, NPM, PIP, Winget, Chocolatey.

Messaging and Integration: IBM z/OS Connect, COBOL, JCL, Apache Kafka, RESTful APIs, Microservices, Web Services, JWT, OAuth2, Postman

Data and Configuration: JSON, XML, YAML, YML, PostgreSQL, Git, GitHub, BitBucket, GitBash.

Observability and Monitoring: Splunk, Datadog, New Relic (JSON Logging), Grafana, AWS CloudWatch.

AI and Generative Engineering: GitHub Copilot, OpenAI Codex, ChatGPT, Google Gemini, Anthropic Claude, Prompt Engineering.

Methodologies and Environments: Site Reliability Engineering (SRE), Agile (Scrum/Kanban), Waterfall, Domain-Driven Design (DDD), Test-Driven Development (TDD).

Operating Systems: Linux, Unix, Windows.

Experience

Company: Handshake – *Contract*

Role: Fellowship - AI Model Image | Accuracy | Composition | Technical Trainer

Duration: Mar 2026 to Present

- Evaluating and refining multimodal AI model outputs for frontier research labs, focusing on one of the following; image/accuracy/composition/technical rendering.
- Participating within the OpenAI Codex Creator Challenge, 2026

Company: University of Phoenix (UOPX)

Role: Senior Software Engineer (Platform & API)

Duration: Nov 2022 – Aug 2025

- **Cloud Infrastructure & IaC:** Provisioned AWS resources using Terraform and Spacelift, engineering robust CI/CD pipelines on EKS/EC2/ECS to automate the onboarding of project teams for third-party Flowable & Documentum integrations backed by RDS PostgreSQL, DynamoDB, & RedShift Resources.
- **API Modernization:** Automated and enhanced Documentum and Funding Domain RESTful APIs, sunsetting legacy processes to optimize service consumption across the infrastructure. Integrated Event Driven Design Patterns tying AWS MSK & Glue to Kafka to increase performance, throughput, and reduce latency across the wire.
- **Technical Debt & Security:** Led critical migrations from Java 7/Spring 2.x to Java 21/Spring Boot 3.x; executed a major OpenText Documentum upgrade (7.2 to 16.7.9) and managed the integration of customized components.
- **Identity & Observability:** Integrated Microsoft Entra ID (SSO) with OAuth2/JWT for multi-tenant security; implemented platform-wide JSON logging (Log4J2/New Relic) and dashboards to reduce MTTR.
- **AI & SDLC Acceleration:** Leveraged Amazon Q and GitHub Copilot to accelerate development; demonstrated the use of **Google Gemini to generate Java JUnit classes in real-time** and built a Jira Support Dashboard via prompt engineering in 90 minutes.
- **Technical Writing & Mentorship:** Authored exhaustive documentation in Confluence, including '**Golden Path**' **Roadmaps, RCA guides, and API REQ/RESP examples**; mentored junior engineers to eliminate knowledge silos during rapid growth.

Company: Kemper – Insight Global - Contract

Role: Senior Software Engineer - Cloud SecDevOps

Duration: Mar 2022 to Aug 2022

- **Security Orchestration & POCs:** Led high-impact Proof of Concepts (PoC) for AWS Pod-Level Security Groups on EKS to achieve granular network isolation and a hardened security posture for containerized workloads.
- **DevSecOps Automation:** Integrated JFrog X-Ray vulnerability scanning into Jenkins CI/CD pipelines; engineered custom abstractions via Groovy Shared Libraries, CLI, and Artifactory plugins to automate security gates for Docker images.
- **Infrastructure & Tier-3 Support:** Maintained/Administered enterprise Jenkins pipelines to ensure 24/7 system availability within an Agile Single-Task environment.
- **Governance & Velocity:** Accelerated project onboarding by developing CI/CD Pipeline Boilerplates and providing technical training, reducing manual configuration time for engineering teams while ensuring governance compliance.
- **Technical Documentation:** Authored and published comprehensive developer reference materials in Confluence, including Root Cause Analysis (RCA), Scope of Work (SOW), and Troubleshooting Guides.

Company: Allstate

Role: Lead Software Engineer

Duration: Mar 2019 – Mar 2022

- **Cloud & CaaS Orchestration:** Architected a high-availability **Azure/CaaS** environment using **Jenkins HTML Interfaces** and **Groovy** to manage 52 Docker images across 12 Kubernetes namespaces for the "Transformative Growth" initiative.
- **Mainframe Modernization:** Spearheaded the **IBM z/OS Connect** integration for Custom Application BatchCard Services, bridging mission-critical legacy mainframe systems with a modern **RESTful Microservice** architecture.
- **Enterprise Tooling & Standards:** Engineered a custom **Java Spring Boot Wire Mock Framework** (JSON-based API simulation) adopted as an enterprise standard. Established **IDE configurations** and build practices (Maven/Gradle) to unify the developer experience.
- **Data Architecture & Observability:** Directed **Oracle PL/SQL** and **MS SQL Server** DBA tasks including data modeling and normalization; implemented **Splunk** for real-time production monitoring and alerting with respect to domain driven dashboards.
- **Technical Governance:** Served as an early adopter and SME for **AppFabric/Marketplace** ecosystems. Authored exhaustive documentation in **Confluence**, including **Architecture Design, Governance Guidelines, and Project Build Roadmaps**.
- **Architectural Documentation:** Authored exhaustive technical resources in **Confluence**, including Project Architecture & Design, Governance Guidelines, Root Cause Analysis (RCA), and Microservice/API REQ/RESP examples.

Company: Leidos - Collabera - Contract

Role: Senior Software Engineer

Duration: May 2018 – Mar 2019

- **Greenfield Engineering:** Engineered a mission-critical **JavaFX/Java** "Live Fire Weapons Assessment" application for the Government of Egypt, utilizing **IntelliJ IDE** to translate complex **SOWs** into a high-performance system.
- **UI/UX & Asset Design:** Designed a secure **MVC** framework using **JavaFX, CSS, and HTML**; utilized **Adobe Photoshop** to create custom UI assets and data-visualization components for international client specifications.
- **Asynchronous Messaging:** Integrated a **RabbitMQ** Interface Service Handler using **JSON** schemas to establish a decoupled, real-time communication layer between assessment modules.
- **Standards & Quality:** Enforced **Agile** methodologies and **OOD/OOP** principles, utilizing **Git** for version control and **Gradle** for automated build orchestration and dependency management.
- **Leadership & Documentation:** Led peer code reviews and introduced **Usability Metrics** (including **JavaScript/jQuery** for internal reporting tools); authored exhaustive technical manuals in **Confluence**.

Company: Lockheed Martin - Apex Systems - Contract

Role: Senior Software Engineer

Duration: Oct 2017 – Apr 2018

- **Defense Systems Engineering:** Engineered core enhancements for the **F-35 ALIS** platform, a global CMMS managing maintenance and logistics for the DoD's premier fighter jet program within an **Agile** framework.
- **Asset Lifecycle Management:** Integrated critical features for **Inventory, BOM, and Unit**

Maintenance History modules using **Java** and **SQL**, ensuring 100% accuracy for mission-critical defense assets.

- **Full-Stack Development:** Delivered high-availability logistics solutions leveraging **Java**, **JavaScript (jQuery)**, **JSP**, **HTML**, and **XML/JSON** on a **WebSphere** platform via the **Eclipse IDE**.
- **Version Control & Build Automation:** Managed source code across both **SVN** and **Git** repositories; utilized **Jenkins Pipelines** with **Maven** and **Gradle** to automate complex build processes.
- **SME & Technical Writing:** Served as **SME** for Tier-3 support, bridging the gap between field personnel and engineering to meet **SLAs**. Authored exhaustive technical documentation in **Confluence** and **JIRA** as a **Technical Writer**.

Company: OneMain Financial – Contract

Role: Senior Backend Engineer

Duration: Jan 2017 – Sep 2017

- **Financial API Architecture:** Architected 24/7 **Java/J2EE** APIs and **REST/SOAP Web Services** using **Spring/Spring Boot** and **Hibernate 3.0** to enable real-time analytics for automotive risk mitigation.
- **Modernization & Frameworks:** Enhanced legacy business flows by implementing **Jersey** and **Jackson** for optimized **JSON/XML** processing, significantly improving response times for asset recovery reporting.
- **Data & Messaging Integration:** Optimized complex data exchanges between **DB2**, **SQL Server**, and **Oracle PL/SQL** within a **WebSphere** environment to facilitate seamless data flow across the lending department.
- **SDLC & Tooling:** Managed code assets using **SVN** and automated builds via **Jenkins Pipelines** and **Maven**; utilized **JIRA** and **Confluence** within an **Agile** framework to track deliverables.
- **Quality & Compliance:** Spearheaded testing using **SOAP UI** and **JUnit**, satisfying strict financial auditing requirements. Authored exhaustive documentation as a **Technical Writer** for the Personal Loans division.

Company: Heritage Services

Role: Senior Software Engineer

Duration: Apr 2015 – Aug 2016

- **Open Source GIS Transition:** Spearheaded the move from proprietary GIS to **Leaflet** and **OpenStreetMap**, reducing licensing costs and standardizing **JSON/XML** and **AJAX** development conventions within an **Eclipse IDE** environment.
- **Data-Driven Architecture:** Architected **GeoMapping** enhancements using **Java** and **Hibernate 3.0** to integrate customer/supplier datasets, identifying "Zero Landfill" opportunities that directly drove organizational sales growth.
- **Logistics & Financial Engineering:** Refined routing logic and developed **batch processing systems** using **Oracle PL/SQL** for precise financial reporting and "Green Alternative" program calculations.
- **Full-Stack Web Delivery:** Leveraged **JavaScript (jQuery)**, **HTML**, and **CSS** to deliver high-availability features on a **WebSphere** platform, ensuring strict data integrity and superior **Usability Metrics**.
- **SDLC Governance:** Operated within a structured **Waterfall** methodology to manage the full lifecycle, including automated testing and **environment synchronicity (DEV/TEST/PROD)** for mission-critical client financials.

Company: Capita Technologies

Role: Project Manager Consultant

Duration: Dec 2013 – Apr 2015

- **Project Governance & Strategy:** Executed complex **RFP contracts** and **Subcontractor Statements of Work (SOW)**, ensuring all deliverables met rigorous technical and legal specifications.
- **WBS & Resource Management:** Orchestrated the **Work Breakdown Structure (WBS)** to allocate team resources effectively, maintaining project health across milestones to ensure on-time and on-budget delivery.
- **Stakeholder Communication:** Authored comprehensive status reports including **Executive Summaries, Risk Mitigation Plans, and Burn-down Metrics** to convey project "health" to key stakeholders.
- **Team Leadership & Dynamics:** Enforced open-door policies and motivated cross-functional teams to maintain fluid project dynamics, ensuring resource efficiency and accuracy across the SDLC.
- **Product Evangelism:** Provided on-site/off-site cross-training and **application demonstrations** for the Capita Case Suite of Products to support sales, marketing, and client onboarding efforts.
- **Technical Oversight:** Leveraged **Oracle PL/SQL, XML, and JSON** knowledge to bridge the gap between business requirements and technical implementation within an **Agile** environment.

Education

Bachelor of Science: Computer Science • Indiana State University • Terre Haute, IN

Bachelor of Science: Mechanical Engineering • Southern Illinois University • Carbondale, IL

Certifications

- **Coursiv**
 - AI Master Program (*ChatGPT, Claude, Myjourney, Lovable, Gemini, Jasper AI, Stable Diffusion, DeepSeek, Veo, Perplexity*)
- **OPENEDG** – Python Institute - Python Essentials 2 (PCEP-31-03)
- **OPENEDG** – Python Institute - Python Essentials 1 (PCEP-30-02)

Awards

Eagle Scout: Boy Scouts of America • Paris, IL
