c. Creating a New Project with Allstate MarketPlace

What follows is an itemized list on how a developer resource will create a New Project leveraging the **Allstate MarketPlace**

Step	Instructions	Description / Comments
1	Navigate to the **AllState MarketPlace**	https://marketplace.mgmt.allstate.com/ 2	Scroll Down to Until you see the following (Reference Screen Shot to the Right	
3	Select the **PaaS** (**Platform As A Service**)	4	Redirects you to the following (Reference Screen-shot to the right) Select "**Create a New Product on PaaS**" **More Info Button**	
5	Redirects you to the following (Reference Screen-shot to the right) Select **Get Now Button**	6	Redirects you to the following (Reference Screen-shot to the right) Enter your Network Credentials	
7	Redirects you to the following (Reference Screen-shot to the right) **Fill out the information as shown with the following e xceptions** **a.** Name of Product **b.** Name that will appear in GitHub, PCF, etc **c.** System Role ID Name This is restricted to a Maximum of 11 Characters after the "**sys-**" Prefix **d.** Description **These values are specific to the project.** **What is seen in the screen-shot to the right are examples reminiscent of a HELLO WORLD.** **The formats would be the following:** "**AB-** ***insert YourValueHere*****-PCF**" "**sys-*****insert YourValueHere***"	
8	Scroll Down to the following Sections (Reference Screen-shot to the right) **Fill out the information as shown with the following e xceptions** **a.** Owner **b.** Product Manager **c.** Developers **d.** Additional Developers ***Make certain to be aware of your team members and add the appropriate values within*** ***this MarketPlac e Section***	
9	Scroll Down to the following Sections (Reference Screen-shot to the right) **Fill out the information as shown with the following e xceptions** **a.** Enterprise Criticality Tier ***(Tier 9 has been chosen here however confirm with your Architect or Primary Engineer)*** **b.** Kafka (Optional) ***NOTE: For now "NO" has been selected with the understandi ng that KAFKA can be*** ***added at a later time. What that effort looks like, I am unaware as*** ***of this writi ng.***	10	Click the "**N EXT**" Button	Redirects you to the following (Reference Screen-shot to the below)
11	Review your Project Details. Take special note of the following: **a.** System Role ID Name **b.** Name of Product **c.** Name that will appear in GitHub, PCF, et cetera	

These values will be important at the time of configuring your Developer IDEas well as the locations for your GitHub Repository

	, your Jenkins Pipeline, your PCF Location, Web Services, Deployment Locations etcetera.	
12	Click the "**SUBMIT**" Button	Redirects you to the following (Reference Screen-shot to the below)
13	As the screen shot depicts the **AllState MarketPlace** is now generating the projects developer pipeline.	

It will generate the following for the developer:

a. System Role ID

b.. BarometerIT Number

c. GitHub

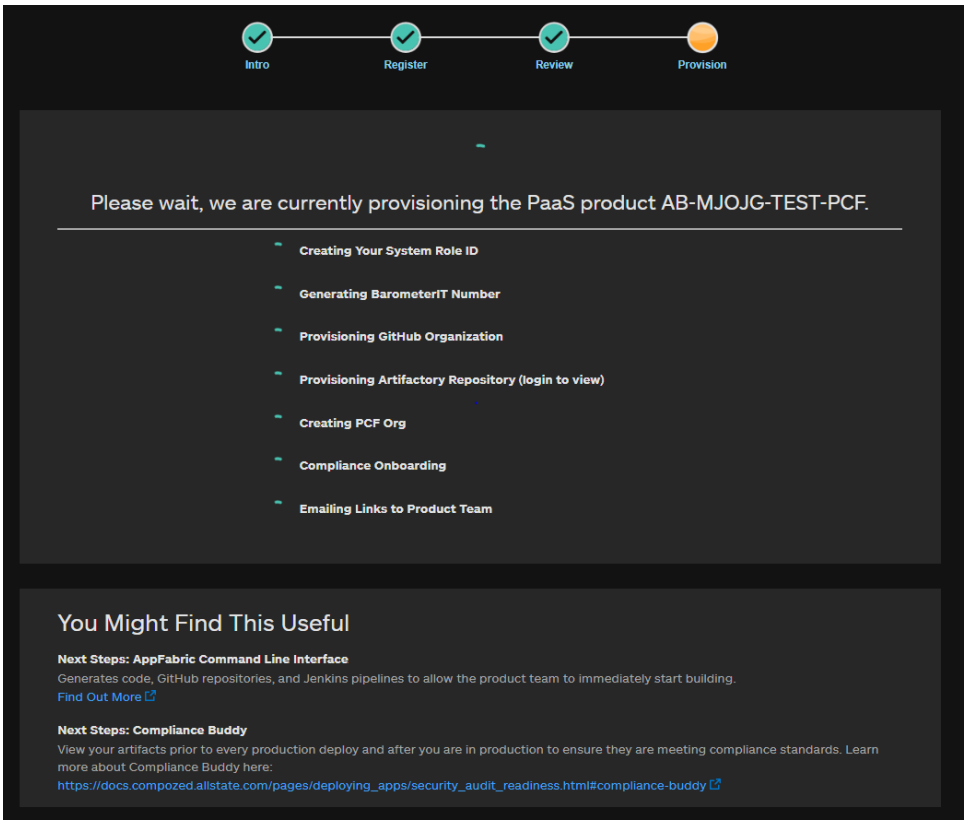
d. Artifactory

e. PCF

f. Compliance Buddy Onboarding

g. Jenkins Pipeline

h. A series of emails will be received documenting the pipeline.



⚠ Pay special attention to the Emails that are generated. It will contain all of the

pertinent information generated pipeline, in addition to a **GENERATED PASSWORD**, for the generated **System Role ID**. **All in**

formations should be shared with your developers. They will require them when they spin up their Developer IDE (Integrated D
