Developer Workstation - Hardware & Software Requirements

Created by Johnson, Maurice, last modified on Jun 11, 2021

*****These are recommendations provided by the Vendor*****

Hardware Requirements

Motherboard Processor (CPU)	Intel Core i7-8650U CPU @ 1.90GHz 2.11 GHz, 4 Core, Virtualization Enabled or Higher or AMD Ryzen 7 Equivalent or Higher
RAM	32Gb+
System Type	x86-64, ARM
Operating System	Windows 10+ or a Ubuntu based Equivalent (ie: Photon OS, RancherOS, Ubuntu 14.04, CentOs) ***NOTE**: For Windows, must be capable of Microsoft-Hyper-V*
Storage	300Gb's - 1Tb+

Software Requirements

Software (Required)	Description	Reference Link
Eclipse	**Eclipse IDE 2021-03**: The Leading Open Platform for Professional Developers and Integrated Development Environments(IDE). This is simply the latest Open Source Version. Equivalent Eclipse IDE's are also encouraged.	https://www.eclipse.org/downloads/download.php?file=/oomph/epp/2021-03/R/eclipse-inst-jre-win64.exe
Git/GitHub Desktop	**Version 2.8.+(x64): S**oftware development version control using Git.	https://github.allstate.com/
OpenJDK 11	**OpenJDK11**: Java™ is the world's leading programming language and platform. AdoptOpenJDK uses infrastructure, build and test scripts to	https://adoptopenjdk.net/

	produce prebuilt binaries from OpenJDK™ class libraries and a choice of either OpenJDK or the Eclipse OpenJ9 VM. All AdoptOpenJDK binaries and scripts are open source licensed and available for free.	
Maven	**Maven 3.3+:** A tool that can now be used for building and managing any Java-based project.	https://maven.apache.org/
Docker	Docker helps developers bring their ideas to life by conquering the complexity of app development. We simplify and accelerate development workflows with an integrated dev pipeline and through the consolidation of application components. Actively used by millions of developers around the world, Docker Desktop and Docker Hub provide unmatched simplicity, agility and choice	https://www.docker.com/get-started
Node.js	**LTS Version: 14.17.+ (includes npm 6.14.+):** As an asynchronous event-driven JavaScript runtime, Node.js is designed to build scalable network applications.	https://nodejs.org/en/download/
npm	The free npm Registry has become the center of JavaScript code sharing, and with more than one million packages, the largest software registry in the world.	https://www.npmjs.com/
Yarn	Yarn is a package manager that doubles down as project manager. Whether you work on one-shot projects or large monorepos, as a hobbyist or an enterprise user, we've got you covered.	https://yarnpkg.com/getting-started
Swagger	An Interface Description Language for describing RESTful APIs expressed using JSON. Swagger is used together with a set of open-source software tools to design, build, document, and use RESTful web	https://swagger.io/

	services. Swagger includes automated documentation, code generation (into many programming languages), and test-case generation.	
Prettier	Prettier is an opinionated code formatter with support for: • JavaScript (including experimental features) • JSX • Angular • Vue • Flow • TypeScript • CSS, Less, and SCSS • HTML • JSON • GraphQL • Markdown, including GFM and MDX • YAML	https://prettier.io/docs/en/install.html
PostMan	A great tool when trying to dissect RESTful APIs made by others or test ones you have made yourself. It offers a sleek user interface with which to make HTML requests, without the hassle of writing a bunch of code just to test an API's functionality.	https://www.postman.com/downloads/
Software (Recommended)	**Description**	**Reference Link**
PowerShell	Windows PowerShell is a powerful tool for automating tasks, simplifying configurations, performing bulk file IO. It can be used to automate almost any task in the Windows ecosystem, including active directory and exchange.	https://docs.microsoft.com/en-us/powershell/scripting/install/installing-powershell?view=powershell-7.1
Notepad++	Notepad++ is a free (as in “free speech” and also as in “free beer”) source code editor and Notepad replacement that supports several languages. Running in the MS Windows environment, its use is	https://notepad-plus-plus.org/downloads/

	governed by GNU General Public License.	
Kdiff3	KDiff3 is a diff and merge program that • compares or merges two or three text input files or directories, • shows the differences line by line and character by character (!), • provides an automatic merge-facility and • an integrated editor for comfortable solving of merge-conflicts, • supports Unicode, UTF-8 and other codecs, autodetection via byte-order-mark "BOM" • supports KIO on KDE (allows accessing ftp, sftp, fish, smb etc.), • Printing of differences, • Manual alignment of lines, • Automatic merging of version control history (Log), • and has an intuitive graphical user interface. • Windows-Explorer integration Diff-Ext-for-KDiff3 - shell extension included in installer (originally by Sergey Zorin: see also Diff Ext) • KDE-Konqueror/Dolphin service menu plugin • Simplified integration with IBM-Rational-Clearcase for Windows (Details). • Read what else is special in a short abstract (PDF).	http://kdiff3.sourceforge.net/
Graphviz	Graphviz is open source graph visualization software. Graph visualization is a way of representing structural information as diagrams of abstract graphs and networks. It has important applications in networking, bioinformatics, software engineering, database and web design, machine learning, and in visual interfaces for other technical domains.	https://graphviz.org/

Plantuml	**PlantUML** is a component that allows to quickly write : • Sequence diagram • Usecase diagram • Class diagram • Object diagram • Activity diagram (here is the legacy syntax) • Component diagram • Deployment diagram • State diagram • Timing diagram The following non-UML diagrams are also supported: • JSON data • YAML data • Network diagram (nwdiag) • Wireframe graphical interface (salt) • Archimate diagram • Specification and Description Language (SDL) • Ditaa diagram • Gantt diagram • MindMap diagram • Work Breakdown Structure diagram (WBS) • Mathematic with AsciiMath or JLaTeXMath notation • Entity Relationship diagram (IE/ER)	https://plantuml.com/

McClure, Rick

I would change HW requirements to "suggested". This far exceeds our developer build standards and we are currently performing the work with lessor build.

Johnson, Maurice

Unfortunately @McClure, Rick we have not been able to successfully perform the work due to Technology Gaps here at Allstate. For Example 'Docker' is still within the PEAP Process, awaiting approval. According to the Vendor, Docker alone requires 16Gb's of RAM, to be able to run their Application Services successfully; hence the 32 GB's requirement.
