24 Years of Engineering Expertise | Complex Systems Translation | AI/GenAI Content Strategy

Highly accomplished Engineer-Writer with over two decades of experience designing and documenting enterprise-grade Java/Spring Boot architectures, Cloud-Native, Cloud-First platforms, and AI integrations. Expert at "decoding" complex technical specifications into accessible user manuals, API documentation, and strategic roadmaps. Currently leveraging a deep background in LLMs, Prompt Engineering, and Python to develop professional non-fiction content for the IT industry.

CORE COMPETENCIES

- **Technical Writing:** User Manuals, API Reference (Swagger/OpenAPI), Release Notes, Installation Guides, RCA Reports, FAQ Development, and Online Help Content.
- **AI/GenAI Content:** Documentation for LLM Orchestration, Prompt Engineering Patterns, Agentic AI Workflows, and Observability in AI Systems.
- **Information Architecture:** Auditing legacy documentation, standardizing style guides (Docs-as-Code), and creating visual process diagrams (UML, Flowcharts).
- **Collaboration:** High-level SME interviewing, cross-functional alignment (Dev/UX/Product), and mentorship.
- **Technology:** Java (8–21), Python, Spring Boot, Spring Framework, AWS (EKS/ECS), Azure, StackEdit.io, POSTMAN, Swagger/OpenAPI, Splunk, New Relic, Confluence, Git.

PROFESSIONAL EXPERIENCE

TECHNICAL AUTHOR (Professional Non-Fiction) | *Self-Directed Project* | **Aug 2025 – Present**

- **Information Gathering & Content Creation:** Researching and drafting a professional manuscript on the IT Industry, with respect to Artificial Intelligence, Regulations, Impact to Economy, Hiring Practices, Interviewing, and overall Observational both current and history.
- **Audience Analysis:** Tailoring complex regulatory and technical concepts for a broad professional audience, ensuring clarity and accessibility.
- **Standardization:** Managing the end-to-end editorial process, including structural editing, trim-size optimization, and technical fact-checking.

SENIOR SOFTWARE ENGINEER (Platform & API) | *University of Phoenix* | **Nov 2022 – Aug 2025**

- **Documentation Maintenance:** Authored the "Golden Path" Roadmap and "Lift and Shift" integration strategies for third-party software (Flowable | Documentum) on AWS EKS.
- **Visual Integration:** Developed comprehensive technical diagrams and READMEs for CI/CD AWS Pipelines, enabling rapid self-service onboarding for project teams.
- **SME Collaboration:** Acted as the primary SME to document the migration POC from Java 7 to OpenJDK 11, detailing technical debt reduction and security hardening.
- **Observability Documentation:** Created Splunk and New Relic dashboards; authored the associative usage guides to reduce Mean Time to Resolution (MTTR) for support teams.

SENIOR SOFTWARE ENGINEER | *Kemper* / Insight Global| **Mar 2022 – Aug 2022**

- **Content Creation:** Authored deep-dive Root Cause Analysis (RCA) reports and "Lessons Learned" whitepapers following high-impact security PoCs.
- **Standardization:** Engineered CI/CD Pipeline Boilerplates and authored the accompanying documentation to ensure governance compliance across engineering teams.

LEAD SOFTWARE ENGINEER | *Allstate* | **Mar 2019 – Mar 2022**

- **Information Gathering:** Interviewed cross-functional stakeholders to document the integration of ZOS Connect (Mainframe) with modern RESTful Microservices.
- **API Documentation:** Designed and documented the enterprise-standard WireMock Framework, including REQ/RESP examples and API route definitions in Confluence.
- **Instructional Writing:** Mentored teams on RESTful API design patterns and CI/CD paradigms, developing standardized "Team Governance Guidelines."

SENIOR SOFTWARE ENGINEER | *Lockheed Martin / Leidos* | **Oct 2017 – Mar 2019**

- **SME Advisory:** Translated complex Statements of Work (SOW) into high-performance functional application designs and user-facing documentation.
- **Field Support Documentation:** Bridged the communication gap between field personnel and engineering teams by authoring troubleshooting guides for mission-critical defense platforms (F-35 ALIS).

TECHNICAL TOOLKIT & AI RESEARCH

- **AI Tools:** Vibe Coding (GitHub Copilot, Gemini, Claude, Amazon Q) | Prompt Engineering | Jira Support Dashboard development via AI.
- **Documentation Tech:** Confluence | Markdown | GitHub/Bitbucket (Docs-as-Code) | Swagger/OpenAPI | JSON/XML formatting.
- **Certifications :** Python Essentials 1 & 2 (PCEP) | Artificiel Intelligence for Students
- **Nanodegrees**: Udacity AI Programming with Python
- **Domain Expertise:** Financial Services | Defense | Insurance | Higher Education | Ecommerce

---

EDUCATION & AWARDS

- **Bachelor of Science in Computer Science** | Indiana State University
- **Bachelor of Science in Mechanical Engineering** | Southern Illinois University
- **Eagle Scout** | Boy Scouts of America
