B. Indiana State University (ISU)

- Computer Science : https://cs.indstate.edu/

C. ISU - Professor - Geoffrey Exoo

- https://isu.indstate.edu/~gexoo/

D. ISU - Professor - James Ball -

James Ball was a professor in the Computer Science department at Indiana State University, where he taught from at least 1997 until his

passing. He was remembered fondly by students for his approachability, willingness to help, and effective teaching style, with one student noting he was "a great man, who loved teaching!" He taught courses such as CS101, CS151, CS260, and CS361, with ratings indicating he was well-regarded for his course quality, though some found his classes easy in terms of difficulty.

Important Note: James Ball passed away a few months after the last student review posted on RateMyProfessors (around April 2012). As of the current date (February 27, 2026), he is no longer affiliated with Indiana State University.

Presidential Executive Orders

A. EO 14365 focuses on federal preemption of state-level AI laws.

The Problem:

The administration views the growing number of divergent AI regulations in states like California and Colorado as a "patchwork" that threatens innovation and economic competitiveness.

The Strategy:

Litigation Task Force: It directed the Attorney General to establish a task force to challenge state AI laws deemed "onerous" or in conflict with federal policy.

Funding Leverage:

It tasks the Secretary of Commerce to condition certain federal grants—specifically remaining Broadband Equity, Access, and Deployment (BEAD) funds—on whether states maintain AI regulations that the administration considers burdensome.

Legislative Push:

It instructs federal advisors to engage with Congress to create a uniform, minimally burdensome national standard that would supersede conflicting state laws.
